

Soumi Paul

Node Js Developer

As a Node.js developer across multiple projects, I have skillfully crafted and deployed intricate features, guaranteeing functionality and quality through thorough testing and debugging. I proficiently utilized JavaScript, Node.js, Express.js, and MongoDB for seamless application development. Additionally, I employed React.js and React Router Dom for efficient front-end development. Throughout the development process, I utilized Git for version control to maintain code integrity.

PROJECTS

iRewardify - Ecommerce Website (02/2024 - Present)

- Description :** Built a MERN stack Gift Card E-commerce website with Node.js, MongoDB, and Express.js for the back end and React.js for front end. Admin dashboard enabled comprehensive management of cart, products, customers, and orders. Facilitated purchase of digital and physical gift cards from top brands, offering personalized options and secure transactions.
- Key Features:** User-friendly interface for a streamlined gift-buying experience. Personalized options for customized gifts. Secure transactions and dynamic features like themed designs and scheduled delivery. Hassle-free shopping with convenient features. Robust backend system providing insights for merchants to showcase products via branded gift cards.
- Role:** Backend Developer
- Technologies Used:** Node.js, Express.js, MongoDB ,JavaScript, React.js etc.
- Outcome:** iRewardify bridges the gap between individuals and businesses, offering convenience, style, and joy in the gift-giving experience.

Guardian Banking Solutions - Revolutionizing Bank-Client Interaction (06/2023 - 01/2024)

- Overview:** MERN stack project focused on revolutionizing bank client interaction. Utilized Node.js, MongoDB, Express.js, and JavaScript.
- Key Features:** Streamlined application process via dedicated operators. Intelligent matching algorithm for personalized quotes, reducing approval time. Promotes transparency, fostering trust between banks and clients. Optimizes banking experience for efficiency and simplicity.
- Technologies Used:** Node.js, Express.js, MongoDB ,JavaScript, React.js etc..
- Role:** Backend Developer
- Mission:** To optimize the banking experience, empower financial institutions, and enhance the financial ecosystem.
